

Meteor-Rack^{W10}

Wall Mounted Media Rack

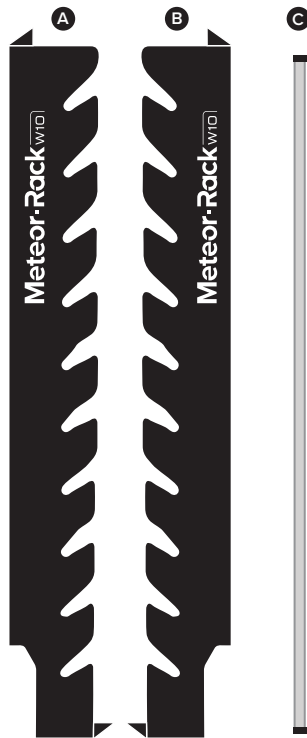

INSTALLATION INSTRUCTIONS

Components

- A** Left upright (1)
- B** Right upright (1)
- C** Support Poles (10)

For installation, you will need:

- +** Level
- +** Hardware

Steps

These instructions are applicable for installation into traditional wood studs on 16" centers

CAUTION  Please read all instructions before attempting installation

Acquire the appropriate mounting hardware with a weight rating to meet the intended use.

1. Align edge of left upright **A** with the center of stud (If mounting to studs through drywall, use a stud finder or small nail to locate stud center)
2. Using a level for accuracy, mark the three mounting positions at the edge (see diagram below)
3. Attach to wall *do not fully tighten hardware until all three bolts have been started and the upright is level
4. Fasten the bottom of the uprights to the ground (optional)
5. Repeat steps 1 to 4 on the opposite side
6. Hang support poles **C** on the uprights, balancing the overhang on each side
